Dear newly enrolled students!

In order to contain the coronavirus pandemic, the start of the lecture period at TU Berlin will be postponed to April 20, 2020. Until further notice, all on-site classes are canceled, hence, also the subject-specific introductions to our master’s programs cannot take place in the usual format. In order for you to get off to a good start in your studies, we are currently setting up online alternatives and replacement offers, which we will published here as soon as possible.

Where can you find current information?

Information on the coronavirus pandemic: Current information and information letters from the TU Berlin’s crisis committee

Where can you get information about your degree program?

In the service box "M.Sc. Studienführer" in the right-hand side navigation, you will find the study guides of our master’s programs, which contain the most important information about your degree program as well as a list of decentralized and dedicated contact persons. More information can be found on the website of your degree program.

Do you have any questions about your degree program?

Please email to the student advisory service. The advisors are students themselves and will be happy to help you with organizational and content-related questions.

What is the special features of some of our master’s programs?

The curriculum of the master’s programs of Computer Engineering, Computer Science (Informatik), Electrical Engineering and Information Systems Management (Wirtschaftsinformatik) is structured in study areas.

What IT systems do we have at TU Berlin and wherefore are they used?

At TU Berlin various IT systems are used, for example, as a learning platform (ISIS) or to register for module examinations (QISPOS). But what exactly are Moses, ISIS, QISPOS and LSF? To answer these questions, some tutorials have been recorded that show what these systems can be used for and, above all, how to use them. Click here for the tutorials.

Switch to online courses

This situation is also unusual for us and we are breaking new ground. Probably, some things will immediately work out the way we imagine. Nevertheless, even under these circumstances we want to try to compensate for canceled on-site classes and services through digital offers. The lecturers are working on formats so that as many modules as possible can also be offered online. You will gradually find out which courses will be offered on a separate website, which we are currently setting up and will link here. English language courses will be marked accordingly.

Check back here regularly to ensure that you are up to date.
